Security 505: Securing Windows and PowerShell Automation

Course Release Notes

Thank you for choosing to train with SANS Online!

This is your checklist to ensure you obtain all courseware components for the course.

❖ Access your online course for 4 months at www.sans.org:
  - Download your SelfStudy MP3 course files by clicking on *SANS SelfStudy*.
  - *OnDemand Students Only:* Access your OnDemand course by clicking on *SANS OnDemand*.

❖ Download your course files from within your online course:
  - This Course Release Notes document
  - Introduction to Lab Exercises
  - VMware Software License handout

❖ Receive a shipment of your course materials:
  - Six course books (Version D03):
    o 505.1: Learn PowerShell Scripting
    o 505.2: Host Hardening and Active Directory Scripting
    o 505.3: Smart Tokens and Public Key Infrastructure (PKI)
    o 505.4: Protecting Admin Credentials and PowerShell JEA
    o 505.5: Thwarting Hackers Inside the Network
    o 505.6: Blue Team PowerShell: WMI, DNS, RDP, and SMB
  - One Handout: Introduction to Lab Exercises
  - USB for lab exercises: Version 505.18.3

  Note to OnDemand Bundle students: Your printed course materials were issued at the SANS live training event you attended; the above shipment refers to Online students only and your version may differ.

If it has been more than one week since you paid for your course and you have not received all of the course materials above, let us know by e-mail at support@sans.org.
